

Unzipping & Installing DataLink Demo on Vista

Security features in Windows Vista do not allow unzipping to a common directory so the following procedure will make DataLink Demo installation easier for Windows Vista users.

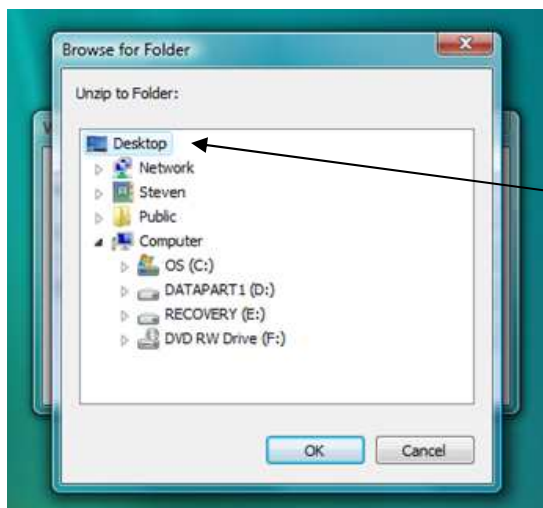

Step 1. Double click the icon DataLinkDemo.exe

Step 2. Click Run

Step 3. Click Browse

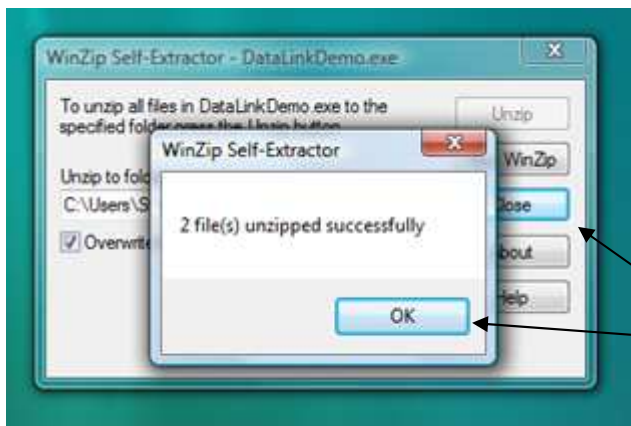

Step 4. In the Browse for Folder window select Desktop

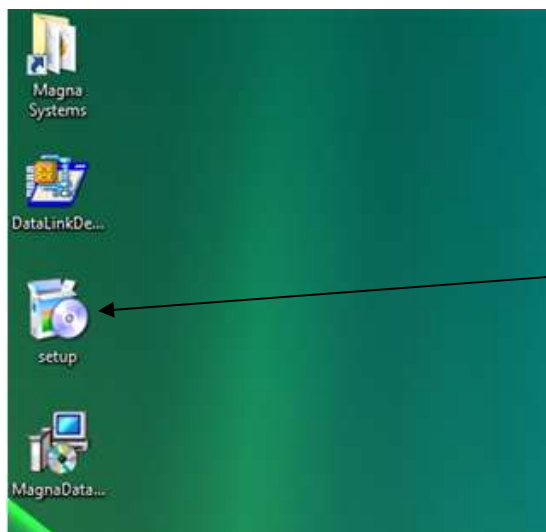

Confirm that Desktop is highlighted and click OK

Step 5. Confirm that the Unzip to Folder address is
C:\Users*YourName*\Desktop
where *YourName* is your personal desktop directory.
Click Unzip

Step 6. A window will appear that says
“2file(s) unzipped successfully”
and two new icons will appear on the Desktop. The two new icons will be named-
setup(.exe) &
MagnaDataLinkDemo(.msi)
Click OK
Click Close

Step 7. To begin installation, double click on the Setup(.exe) icon and follow the installation wizard.
